Experiential Learning

- Field/Industrial visits – Industrial visits are undertaken which offer opportunities to connect academic theories to practical applications.
- Capstone Projects – Students showcase their cumulative learning experiences in the final year of study through capstone projects which requires critical thinking, decision making and team work resulting in community engagement or seeking solutions for societal issues.
- Mini-projects– During the second and third year of study, students execute mini-projects as part of the alternate assessment in few specific courses. Multi-disciplinary projects are encouraged across departments leading to more holistic and effective outcomes.
- Student Club activities – The numerous technical clubs of the institute provide an excellent platform for developing competencies of event planning, logistics, teamwork, entrepreneurial thinking, decision making, leadership, collaboration and adaptability.

Participative Learning

- Lectures and Lab sessions – group discussion, Think-pair-share, online polls, class quizzes, Q&A sessions, case studies, role play, simulations, virtual labs etc enhance student engagement in class and lab sessions.
- Guest lectures – Students are exposed to real-world expertise, networking opportunities and practical in sights of a course through guest lectures delivered by subject matter experts and industry personnel.
- Skill Building Workshops & Value-added courses – Content beyond the syllabus is offered to foster better practical skills relevant to respective engineering stream.
- Peer Learning – This collaborative learning has been effectively adopted to build a positive learning environment in classrooms.
- Student Seminars: The students regularly participate in seminars wherein papers are presented on technical topics to enrich their learning experience.
- Additional Certifications (Employability skills) will be provided to students in each semester.

Problem solving Methodologies

- Tutorial Sessions – These sessions (at least one in every semester) are designed to help students develop problem-solving through practice and guided learning.
- Computational Thinking – Computational thinking is applicable to all engineering streams which helps students approach a problem in a systematic way, promoting effective decision making.
- Flipped Classroom – In this instructional strategy, classroom time is dedicated to problem solving exercises leading to effective collaboration among peers.
- Hackathon/Codethon Activities - The technical clubs organize many coding sessions and competitions to tackle real world problems within a limited time frame. Hackathons are used as an assessment to online courses in this skill set is highly valued in the professional world.
- Competitive Programming – Students are challenged to solve complex algorithmic and computational problems efficiently on competitive coding platforms, which helps them during the placements.
- Usage of Tools – Tools which span a range of domains, from software applications for simulation, analysis and testing are used for problem solving.

Academic Calendar: As per the University Notification the Principal in consultation with the Academic coordinators prepare the Academic Calendar of the institution. The approved calendar is circulated to the staff and posted on the college notice board. The calendar of events includes important academic activities to assist the students and the faculty. Calendar includes Internal Tests, Activities and last working day of the semester.

Adherence to Academic calendar: The Academic coordinators will adhere to the approved academic Calendar. Care is taken to schedule all the internal tests as planned in the academic calendar. Thus an academic calendar provides a complete framework for all the activities in an academic year.

Lesson Plan: Each faculty prepare the lesson plans for their respective subjects. The total number of hours depends on the course credit. All faculties teaching the same course come to consensus about syllabus coverage for every Internal Assessment. Delivery methods and pedagogy for various topics are also stated in the lesson plan.

Maintenance of Daily Diary:

All faculty members maintain the daily diary and update on daily basis what they taught.
